# Avalara | ORACLE

Streamline global compliance and increase accuracy with the only indirect tax solution embedded in Oracle Cloud ERP

Avalara partnered with Oracle to build the only embedded and touchless indirect tax solution in Oracle Cloud ERP, providing secure and reliable services hosted on Oracle Cloud Infrastructure (OCI). With Avalara embedded in Oracle Cloud ERP, global indirect tax content and core configuration to activate calculations are handled automatically – saving businesses valuable time, removing complexities from every transaction, and lowering risk of noncompliance.

Together Avalara and Oracle provide comprehensive, end-to-end global tax compliance through scalable products and services designed to meet your short-term and long-term business needs.

Oracle now offers two Avalara compliance solutions for Oracle Cloud ERP

Oracle Avalara Global Indirect Tax Cloud Service

Avalara AvaTax
Single solution to automate sales and use tax and VAT calculations with advanced reports and analysis tools to drive efficiencies and increase accuracy.

Avalara Global Unified Platform
Next-generation embedded and touchless experience to enable indirect tax capabilities and automated testing for new Oracle Cloud ERP releases.

Evergreen tax content
Cloud-native tax engine fueled by comprehensive repository of geography and tax content supporting 244 countries and territories.

Enterprise support
Customized support process and dedicated Avalara technical team for Oracle customers ensure swift response and resolution.

Oracle Avalara North America Tax Returns Cloud Service

Avalara Managed Returns Premium (U.S. and Canada)
Single source to automate sales tax preparation, filing, remittance, and notice management combined with the help of a dedicated preparer to support custom filing needs.

North America Tax Returns Cloud Services is available after the purchase of Global Indirect Tax Cloud Service.

Benefits of Avalara's next-generation solutions purpose-built for Oracle Cloud ERP

Unified solution

The Avalara Global Unified Platform is purpose-built for Oracle Cloud ERP workflows and hosted on OCI. The solution removes the need for client server installation and reduces the demand of application life cycle management.

Turnkey activation

Global indirect tax content and core configuration to activate calculations are handled automatically, allowing your implementation team to focus on the customization required to meet the needs of your enterprise.

Automated maintenance of global geography and tax content

Oracle Cloud ERP users can offload the time-consuming, easily forgotten task of maintaining a database with regularly changing tax rates and rules and rest easy knowing ongoing geography and tax content maintenance is delivered in an orchestrated fashion with Oracle Cloud ERP.

Extended features and functionality

The Avalara Global Unified Platform provides a single point solution to support order-to-cash and procure-to-pay compliance workflows, tax calculations and reporting to exemption certificate management, business licensing, cross-border compliance, and e-invoicing.

Comprehensive testing

With over 390 automated tests (and counting) for new Oracle Cloud ERP releases, Avalara offers comprehensive testing tools to help ensure tax compliance services get set up properly.

Tax solutions powered by intelligent automation

The Avalara Global Unified Platform gives customers seamless access to Avalara's AI-powered compliance solutions to enhance the product experience and streamline tax management. Today, Avalara leverages AI to enable customers to detect and extract data from exemption certificates, map Harmonized System (HS) and tax codes, and more.

Detailed reporting

Avalara offers advanced reports to help reconcile data, file returns, and gain insights into tax details from your transaction information embedded within the Oracle Cloud ERP.

Returns filed in every jurisdiction

Automate the end-to-end process of tracking obligations, filing returns, and remitting payment with Avalara Returns centrally accessible in Oracle Cloud ERP.

Enterprise-ready technical support

Avalara partners with Oracle to offer top-tier technology and support, aligning with Oracle's mission to bring cloud-based solutions to global enterprises.
